

Nama: Siti Nur Azizah
Kelas: TI-24-PA2
NPM: 242310025
Lab. Pemrograman Web

Tugas Pertemuan 4

1. phpMyAdmin / Database

Membuat database pw_praktikum_db.

Kegunaan: Menyimpan data aplikasi.

2. Backend Express JS

Membuat backend dan install express, mysql2, cors.

Kegunaan: Mengatur server dan koneksi database.

3. Menjalankan Backend

Menjalankan server dengan:

Masuk ke folder backend menggunakan:

cd backend

Lalu jalankan server dengan:

node index

```
backend > cd index.js > ...
1  const express = require("express");
2  const mysql = require("mysql2");
3  const cors = require("cors");
4  const app = express();
5
6  app.use(
7    cors({
8      origin: "http://localhost:3000",
9      credentials: true,
10    })
11  );
12
13  app.use(express.json());
14
15  const db = mysql.createConnection({
16    host: "localhost",
17    user: "root",
18    password: "",
19    database: "pw_praktikum_db",
20  });
21
22  db.connect((err) => {
23    if (err) {
24      console.error("Koneksi ke database gagal:", err.message);
25      process.exit(1);
26    }
27    console.log("Koneksi ke database MySQL berhasil!");
28  });
29
30  app.get("/", (req, res) => {
31    res.send("Server berjalan");
32  });
33
34  app.listen(3001, () => {
35    console.log("Server running on port 3001");
36  });
37
38  app.get("/api/info", (req, res) => {
39    res.json({
40      message: "API MERN Stack Build by Express JS",
41      version: "1.0.0",
42      status: "active",
43      timestamp: new Date(),
44    });
45  });
```

```
Restarting 'index'
Server running on port 3001
Koneksi ke database MySQL berhasil!
```

```
Server berjalan
```

4. Frontend React

Membuat project React/Next.js.

Kegunaan: Membuat tampilan website.

5. Menjalankan Frontend

npm run dev

Kegunaan: Menampilkan website di browser.

```
1 "use client";
2
3 import axios from "axios";
4 import { useEffect, useState } from "react";
5
6 export default function Home() {
7   const [info, setInfo] = useState<any>(null);
8
9   const getAPIInfo = async () => {
10     try {
11       const response = await axios.get("http://localhost:3000/api/info");
12       setInfo(response.data);
13     } catch (error: any) {
14       console.error("Error fetching API data:", error);
15       setInfo(error?.message);
16     }
17   };
18
19   useEffect(() => {
20     getAPIInfo();
21   }, []);
22
23   return (
24     <div>
25       <h1>Hello World!!</h1>
26
27       {info && (
28         <pre>
29           style={{
30             backgroundColor: "#f4f4f4",
31             padding: "10px",
32             borderRadius: "8px",
33             border: "1px solid #ddd",
34             overflow: "auto",
35           }}
36         )}
37       {JSON.stringify(info, null, 2)}
```

```
PS D:\Lab Pemrograman Web\Pertemuan 1\mern-stack\my-first-app-react> npm run dev
> my-first-app-react@0.1.0 dev
> next dev
▲ Next.js 16.2.4 (TurboPack)
- Local:    http://localhost:3000
- Network:  http://192.168.56.1:3000
✓ Ready in 1234ms
GET / 200 in 511ms (next.js: 251ms, application-code: 260ms)
```

New tab x Create Next App x localhost3001 x

localhost:3000

Hello World!!

```
{
  "message": "API MERN Stack Build by Express JS",
